

RCSX Technology and Equipment

IMRO Eddy Current Separator

Recycle Craft[®] by IMRO

Maximum recovery of recyclable materials - IMRO - Europe's conveying and sorting experts

Technology and equipment - IMRO RCSX series - perfectly coordinated

IMRO RCSX B, RCSX C, RCSX D, RCSX D NEO and RCSX JUNIOR - the IMRO product range of eddy current separators as well as their numerous features offer the best technology for the most advanced separation projects. IMRO products are rock solid, thoroughly engineered and constructed with maximum functionality.

The strengths of the RCSX Eddy Current Separators:

- 1 Infinitely variable pole system 0 - 20° electrically or manually
- 2 Removable shell ring for easy maintenance
- 3 Infinitely variable divider
- 4 Lighting in the discharge chute
- 5 Telescope beam for belt change
- 6 Sliding plate in the discharge region
- 7 Central lubrication
- 8 Cleaning brush
- 9 Brush cleaning device
- 10 Guided labyrinth seal between cornering and conveyor belt
- 11 Large inspection windows, both sides
- 12 Exchangeable divider edge
- 13 Feeding and discharge chute with non-stick coating (Advantage for IBA and slag recycling)
- 14 Electric drives with TorqLOC® mounting system (Advantage for IBA and slag recycling)
- 15 Split bearings for anti-corrosion (Advantage for IBA and slag recycling)
- 16 Monitoring Speed/temperature/vibrations

A strong family - IMRO Eddy Current Separators RCSX

The flexible series - Masterpieces of RecycleCraft

IMRO Maschinenbau is an expert in the production of highly efficient eddy current separators for the recovery of valuable materials. 25 years experience in separation technology guarantee highest product quality for our customers. The modular RCSX series covers five tailor made machines for the respective applications. Many special features can be added for the provision of customized machine solutions.

Leading edge technology will increase your productivity and profitability. Our test centre demonstrates the efficiency of the IMRO separation machinery and equipment. Your benefit: Quick results, competent solutions, efficient machinery and equipment for the recovery of valuable materials and immediate profitability.

We increase the efficiency of your recycling systems - IMRO - The interface specialist

RCSX JUNIOR Coarse particle size separator for sorting and separating non-ferrous materials with integrated control panel. The cost efficient alternative

RCSX B/C Medium particle size separator for sorting and separating special non-ferrous materials

RCSX D Fine particle size separator for non-ferrous materials

RCSX D NEO Very fine particle size separator for non-ferrous materials
