

High Efficiency RecycleCraft

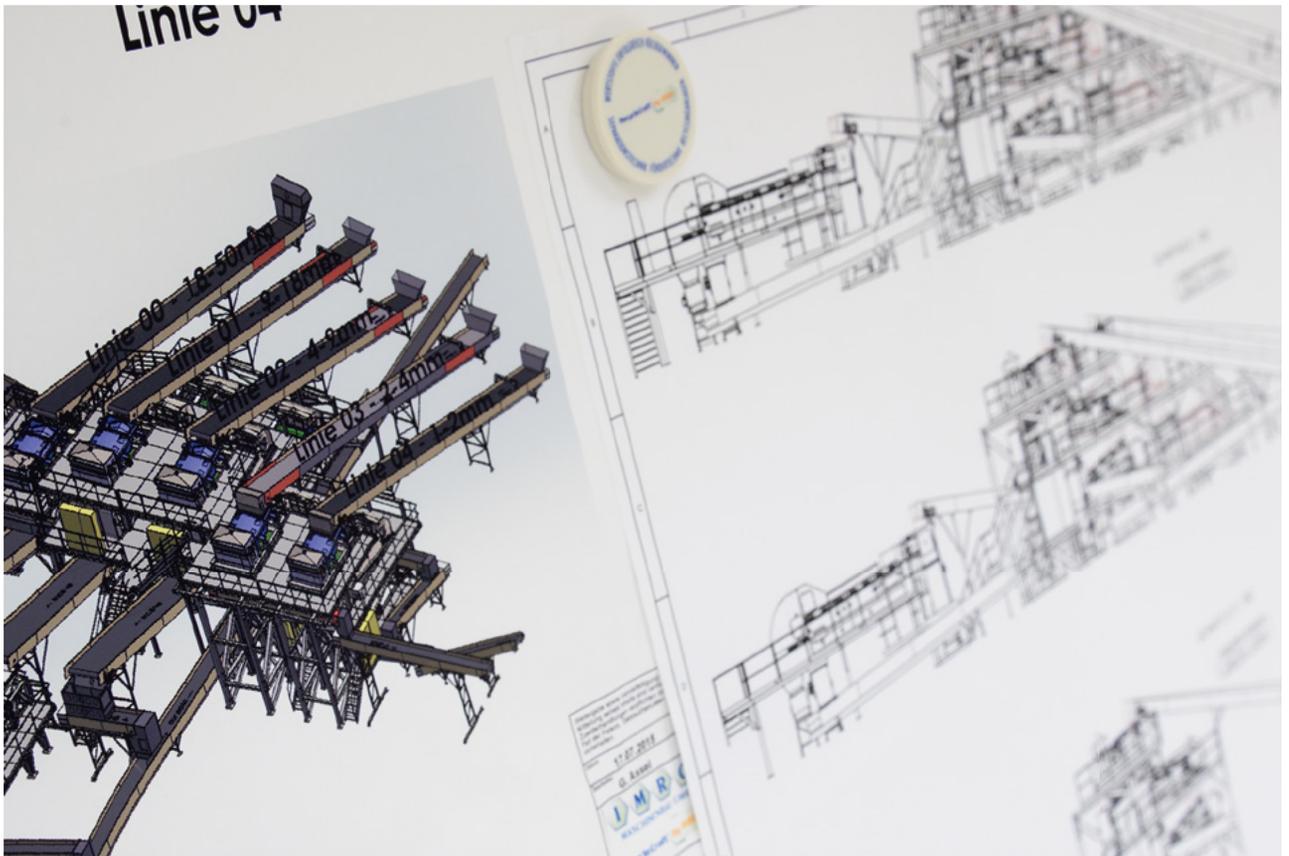

IMRO Recycling plants

Recycle Craft[®] by IMRO

Maximum recovery of recyclable materials - IMRO - Europe's conveying and sorting experts

IMRO Recycling plants - RecycleCraft by IMRO - optimal engineering

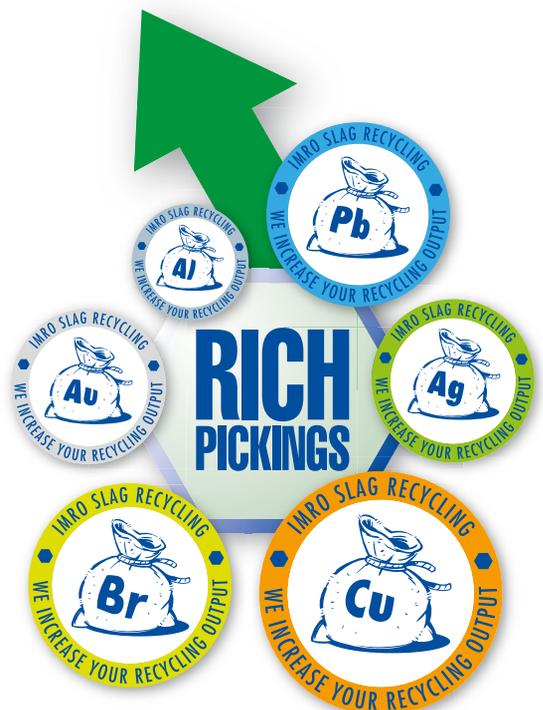

Pure-grade fractions, fast and flexible

IMRO Maschinenbau is your specialist for conveying and separation technology and recycling plants. We deliver turnkey systems from processing to storing recovered materials.

Even the most complex recycling application is no stranger to us. Our plants can be set up for all areas of application for conveying and separating industrial waste, household waste, tyres, textile-based materials and a broad range of plastics, while recovering valuable materials and substitute fuels at the same time.

IMRO conveying and separating systems are available in a variety of versions and can be configured to perform a multitude of tasks.

IMRO Expertise and Experience - Added Value from Metals - Plastics - Wood - Textiles - Rubber

Providing our customers with a broad scope of technical ingenuity. RecycleCraft by IMRO means an overall innovative package, meeting market demands by delivering top-quality and price performance. Maximum value for efficient valuable materials recovery. Absolute reliability and maximum load capacity. Flexibility through modular components. IMRO's core competence and engineering ingenuity increase the productivity of your recycling plants.

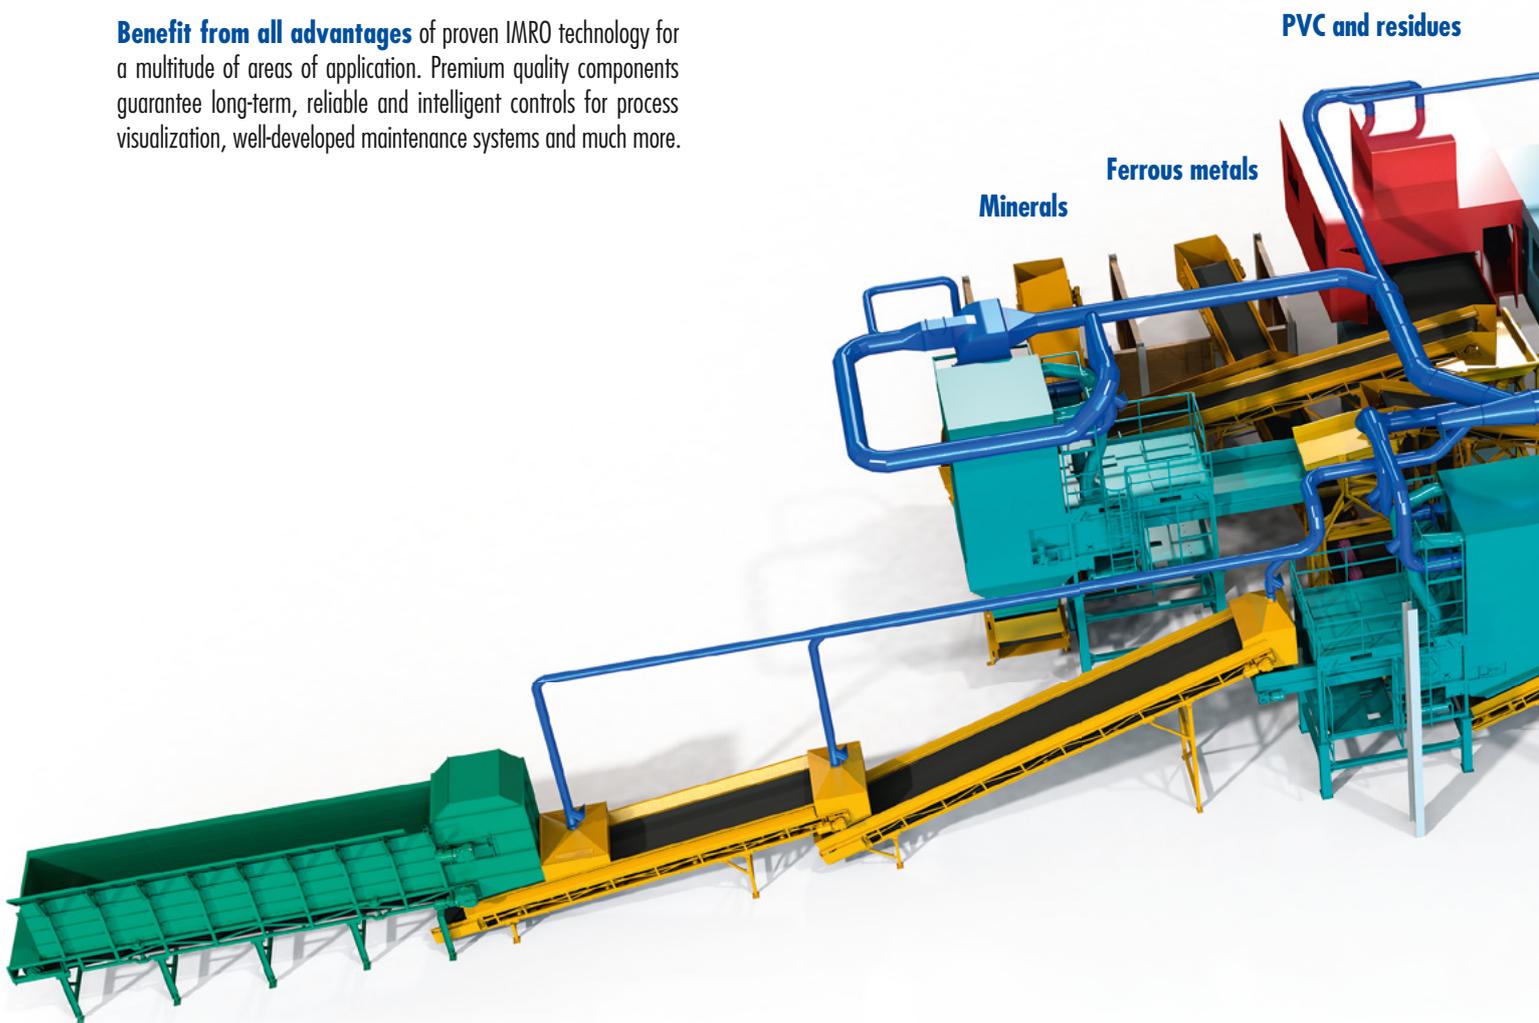

- ◆ **All interfaces within the recycling plant are covered by IMRO**
- ◆ **Including all components: conveyors, screening drums, metering bunkers, separation technology**
- ◆ **Customer-specific module designs**
- ◆ **Long-term energy savings**
- ◆ **Service and support - for a lifetime**

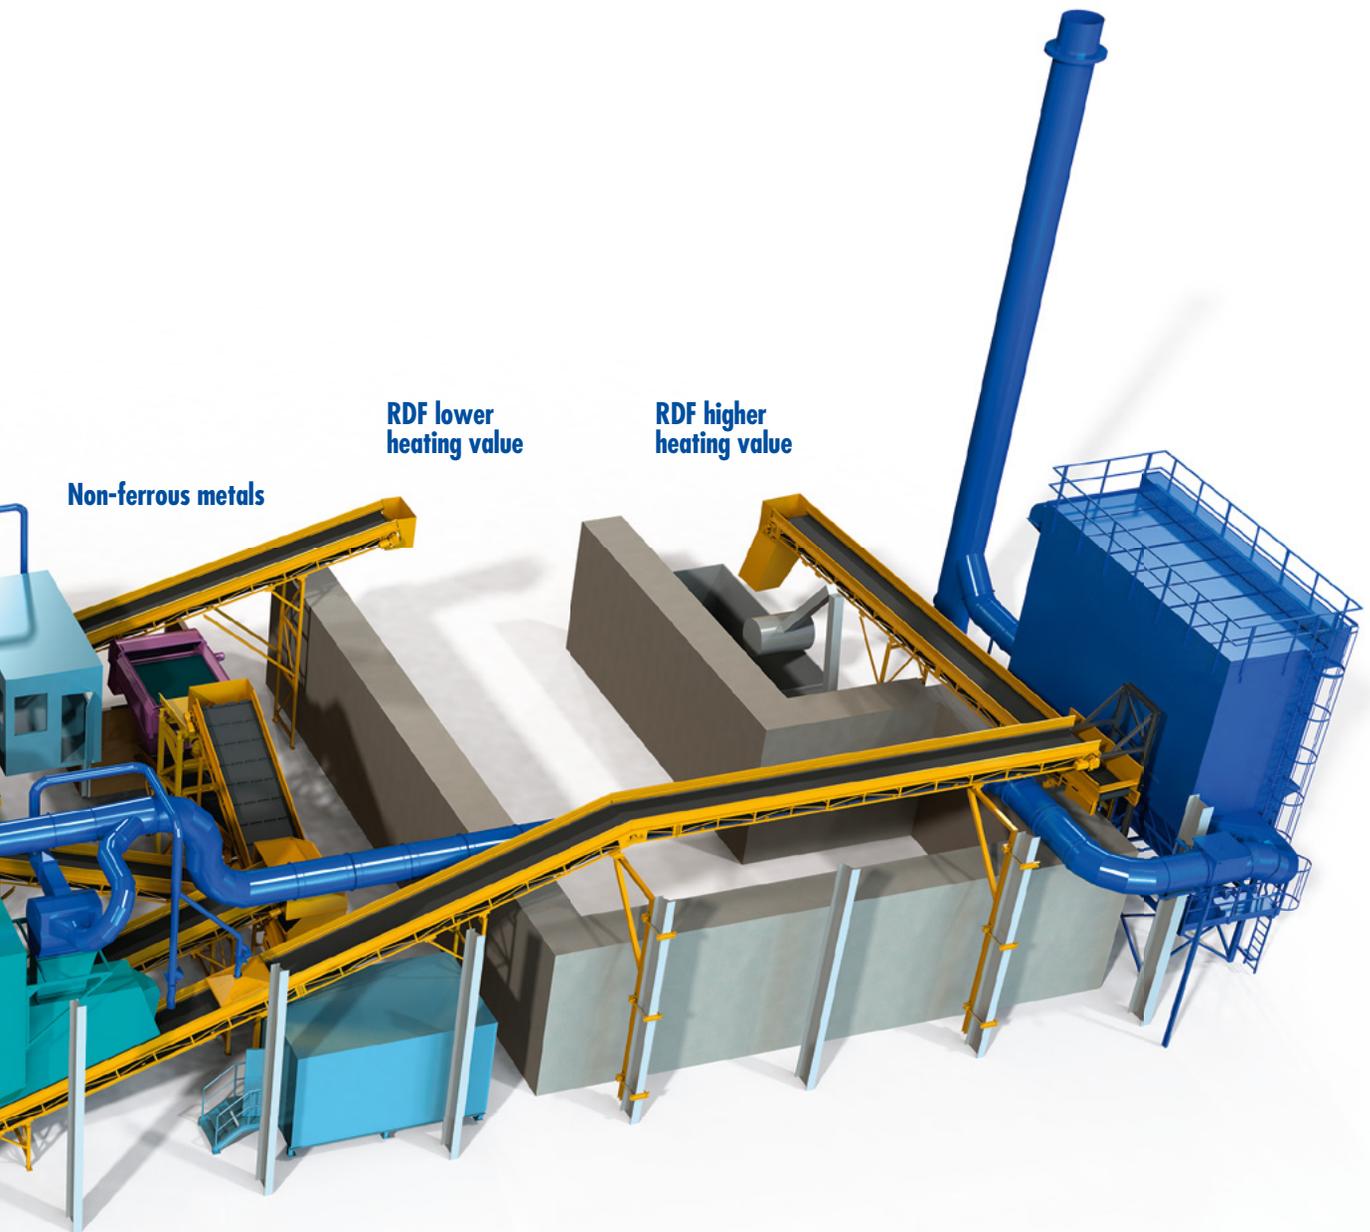

IMRO Maschinenbau - RecycleCraft generates profit and delivers convincing performance

At IMRO the measure of all things is making sure the development of viable technological solutions meets the demands of future dynamic markets in the recycling industry. IMRO is your business partner who provides answers based on vast experience in ferrous, non-ferrous and sensor separation and conveying technology. High up-time makes our recycling technology stand out from the rest. The large number of machines offers a broad field of application.

Benefit from all advantages of proven IMRO technology for a multitude of areas of application. Premium quality components guarantee long-term, reliable and intelligent controls for process visualization, well-developed maintenance systems and much more.

Recycling plants

High up-time and efficient processes are determining factors for success. This is achieved by supporting you with optimal maintenance service.

IMRO TEST CENTRE

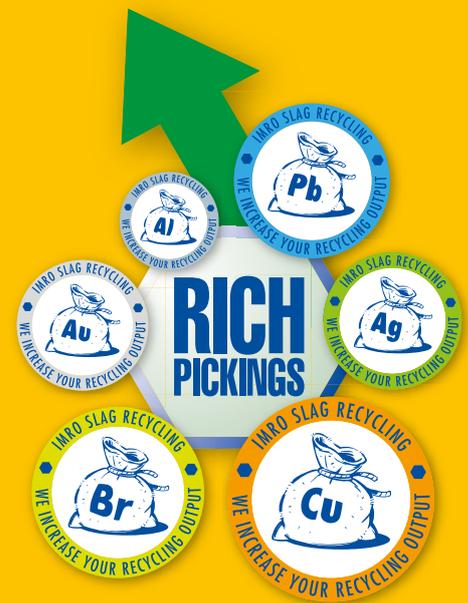

Over 25 Years' Experience in Recycling

Technology always fulfils demands. Would you like to know which valuable materials and impurities are contained in your material flow? Then bring it along and have it analysed in our IMRO Test Centre. Our 25 years' expertise and experience in the recycling industry guarantees we will optimise your recycling processes.

Equipped with cutting-edge technology, IMRO Test Centre staff makes sure you are taking the first step in achieving maximum economy and value recovery. Let us demonstrate the performance and the coordinated interaction between all of the IMRO separator machinery.

Your advantage: Fast results and efficient plants and equipment, plus added value and immediate profitability in all recycling processes.

IMRO increases your recycling output - IMRO the Interface Specialist
